

ENVIRONMENTAL POLICY STATEMENT

CB Skips places great importance on; preventing pollution, preserving the environment and minimising any adverse impacts associated with business activities. This commitment will require the continuous improvement of our operational methods and working practices, including the adoption of sustainable waste management systems and following Best Available Technologies.

We will achieve our Environmental Objectives by:

- Operating at all times in accordance with all relevant legislation, approved Codes of Practice and statutory guidance.
- The education of our workforce to ensure continuing awareness and sensitivity to environmental issues.
- Reducing the amount of waste transported to final disposal through practical and cost-efficient segregation and recycling
- Continually investing into technology and waste outlets that limits the use of landfill and at the same time preserves natural resources
- Minimising our impact on the environment through the efficient use of transport in order to reduce pollution.
- Monitoring environmental performance to establish benchmarks for continuous improvement.

CB Skips Managing Director is responsible for establishing and maintaining an effective Environmental Management System in line with this policy and relevant environmental legislation and standards.

Signed D. Trant
